EDUCATION

Vellore Institute of Technology (VIT), Vellore, India 2019–2023
B.Tech, Computer Science & Engineering (Bioinformatics Specialisation) | CGPA: 9.05/10

BUSINESS EXPERIENCE

Wells Fargo, Bengaluru, India Jan 2026–Present
Senior Software Engineer

- Own end-to-end delivery and production stability for the Valuations portal, coordinating **25+ stakeholders** across business, vendor and technology teams to refine requirements and align releases.
- Owned frontend development and API integration for a trading vendor platform enabling onboarding of **100+ Front and Middle Office companies**, translating business requirements into user-facing workflows and partnering across business, technology and vendor teams.
- Automated monthly generation and distribution of securities holdings and valuation reports for **125 users**, integrating dataset queries, paginated report exports and email delivery with an average turnaround of **~29 seconds per user**.
- Proposed end-to-end workflow enhancements for an external-facing onboarding platform, presenting UI mockups to business stakeholders and driving implementation of secure authentication, authorization and document access workflows.

Wells Fargo, Bengaluru, India Aug 2023–Dec 2025
Software Engineer

- Led the **AI-assisted modernisation of 3 legacy applications** covering 7 business workflows in 3 months, generating ~40% of code with GitHub Copilot and cutting manual deployment steps by 80%; presented to US senior leadership as a benchmark for future upgrades.
- Drove **100% functional test automation** across **4 applications**, including **76 test cases** on one app; became a subject-matter-expert for testing and expanded ownership across projects.
- **Expanded my scope from frontend to full-stack** by learning backend development, Bash scripting and Autosys job scheduling independently; primary frontend developer for trading and reporting applications.

Wells Fargo, Bengaluru, India Jan 2023–Jul 2023
Software Engineer Intern

- Built backend services for interest-rate and foreign-exchange trading applications processing **100K+ market updates per second.**

Wells Fargo, Bengaluru, India May 2022–Jul 2022
Summer Software Engineering Intern

- Owned frontend development of a trading platform with **13 market indicators** and buy/sell strategies, built by a 10-intern team in a hackathon-style internship. Received a Pre-Placement Offer based on performance.

InTouch (startup founded by IIT alumni) May 2021–Aug 2021
Software Engineering Intern

- As the sole frontend developer, turned product designs into a working video-chat website for an early-stage startup, working directly with the founders and UX team.

ADDITIONAL INFORMATION
